1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The disclosure is objected to because of the following informalities: There is no brief description of drawing.

Appropriate correction is required.

3. Claims 1,18-19,21,25,30 are objected to because of the following informalities:

In claim 1, line 17, there is no antecedent basis for "numerical amplitudes"; "numerical amplitude" is not clearly understood;

In claim 18, there is no antecedent basis for "measuring device";

In claim 19, "a receiver" should be ---the receiver---; there is no antecedent basis for "preliminary results";

In claim 21, it is unclear as to what the chosen coefficient is;

In claim 25, "a receiver" should be ---the receiver---; "filtering by means of the signal source" is vague;

In claim 30, there is no antecedent basis for "measured signal", "measuring results" and "remaining signal".

Appropriate correction is required.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17,27 and 29 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Acker (5,729,129).

5. Claims 18-26,28,30,31 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
